Summary

Test Class	Covers	# Tests
LoginPageTests	Login & authentication	11
ProductsPageTests	Product listing & sorting	9
CartPageTests	Shopping cart	8
CheckOutPageTests	Checkout step one (customer info)	9
CheckOutV2PageTests	Checkout step two (order overview)	10
CheckOutCompletePageTests	Order confirmation	2
HeaderTests	Header / navigation menu	5
FooterTests	Footer links	3
Total		57

1. LoginPageTests

src/test/java/saucedemotests/LoginPageTests.java

#	Test Method	Description	Type
1	successfulLoginTest	Logs in with valid credentials (standard_user) and verifies redirection to the Products page.	Standard
2	unsuccessfulLoginFalsePasswordTest	Verifies login fails and shows an error with a correct username but wrong password.	Standard
3	unsuccessfulLoginFalseUsernameTest	Verifies login fails and shows an error with an incorrect username.	Standard
4	unsuccessfulLoginUsernameWithoutPasswordTest	Verifies the "Password is required" error appears when the password field is left blank.	Standard
5	unsuccessfulLoginUsernameWithoutPasswordTestParameterized	Parameterized over standard_user / invalidUser123 — confirms "Password is required" error regardless of username validity.	Param
6	loginTest	Parameterized across all SauceDemo user types (standard_user, locked_out_user, problem_user, performance_glitch_user, error_user, visual_user) — validates correct redirect or lock-out error per user.	Param
7	unsuccessfulLoginPasswordWithoutUsernameTest	Verifies the "Username is required" error appears when the username field is left blank.	Standard
8	unsuccessfulLogiEmptyUsernameEmptyPasswordTest	Verifies the "Username is required" error appears when both fields are left blank.	Standard

9	isErrorMessageDisplayedTest	Verifies an error message is displayed after a failed login attempt.	Standard
10	isErrorMessageDisplayedClickXTest	Verifies the error message can be dismissed using its "X" close button.	Standard
11	loginFormInitialStateUITest	UI validation: font family/size for username, password, and login button, plus button and error message colors.	Standard

2. ProductsPageTests

src/test/java/saucedemotests/ProductsPageTests.java

#	Test Method	Description	Type
1	orderingDropdownValuesTest	Verifies all four sort-dropdown options are present with correct labels (Name A-Z/Z-A, Price low-high/high-low).	Standard
2	orderingProductsFromHighToLowPriceTest	Sorts by "Price (high to low)" and verifies the resulting list is in descending price order.	Standard
3	orderingProductsFromLowToHighPriceTest	Sorts by "Price (low to high)" and verifies the resulting list is in ascending price order.	Standard
4	orderingProductsZtoAAlphabeticallyTest	Sorts by "Name (Z to A)" and verifies the list matches a reverse-alphabetical ordering.	Standard
5	orderingProductsAtoZAlphabeticallyTest	Sorts by "Name (A to Z)" and verifies the list matches an alphabetical ordering.	Standard
6	validateColorChangeOnProductTitleHoverTest	Verifies the "Sauce Labs Backpack" title color changes from default to hover color on mouse-over.	Standard
7	validateBurgerMenuItemsColorsTest	Verifies all burger-menu items turn green (#3ddc91) on hover.	Standard
8	validateBurgerMenuItemsTextTest	Verifies burger-menu items display the correct labels: All Items, About, Logout, Reset App State.	Standard
9	getAllProductsItemsHoveringColor	Verifies every product name changes to the expected hover color.	Standard

3. CartPageTests

src/test/java/CartPageTests.java

#	Test Method	Description	Type
1	getCartPageTitle	Verifies the Cart page title reads "Your Cart".	Standard
2	chooseItemAndValidateNameandButtonColors	Adds/removes items via the Cart page, validating item names and the checkout/remove button colors along the way.	Standard
3	isItemSuccessfullyAddedToCartTestthrowException	Verifies the item is reported as NOT added when no "Add to cart" action was taken.	Standard

4	<code>isItemSucessfullyAddedToCartTestadd</code>	Verifies the item is reported as added after clicking "Add to cart".	Standard
5	<code>addSingleItemByClickingOnNameAndValidateRemoveButton</code>	Adds an item by clicking its name link, then validates the Remove button appears with the correct color and works.	Standard
6	<code>getPriceFromSelectedItemandNameAlsoTest</code>	Validates item price, item name, and cart item count after adding "Sauce Labs Bike Light".	Standard
7	<code>addMoreItemsAndCheckQuantityFieldTest</code>	Adds three items and verifies the cart item count updates to 3.	Standard
8	<code>sucessfullyProceedToCheckoutPage</code>	Verifies clicking Checkout navigates from the Cart page to checkout-step-one.	Standard

4. CheckOutPageTests (Checkout Step 1)

`src/test/java/saucedemotests/CheckOutPageTests.java`

#	Test Method	Description	Type
1	<code>validateTitleName</code>	Verifies the page title reads "Checkout: Your Information".	Standard
2	<code>enterAllFieldsSucessfully</code>	Auto-populates first name, last name, and zip code, then proceeds via Continue.	Standard
3	<code>enterFieldsManually</code>	Manually types first name, last name, and zip code, then proceeds via Continue.	Standard
4	<code>validateErrorMessagewithoutenteringData</code>	Verifies an error is shown when Continue is clicked with no data entered.	Standard
5	<code>loseTheErrorMessage</code>	Verifies the error message can be dismissed via its "X" button.	Standard
6	<code>getColorsFromErrorMessageAndContinueButton</code>	Validates the Continue button color and the error message background color.	Standard
7	<code>getTextFromErrorMessage</code>	Validates the specific error text shown for each missing field: First Name, Last Name, and Postal Code (in sequence).	Standard
8	<code>validateWhatDoesCancelButton</code>	Verifies the Cancel button redirects the user back to the Cart page.	Standard
9	<code>sucessfullyProceedToNextPage</code>	Verifies successful form submission navigates to checkout-step-two.	Standard

5. CheckOutV2PageTests (Checkout Step 2 — Order Overview)

`src/test/java/saucedemotests/CheckOutV2PageTests.java`

#	Test Method	Description	Type
1	<code>checkPricewithTaxIncludedTest</code>	Validates the final total price including tax for the selected item.	Standard

2	checkItemPriceWithoutTax	Validates the item subtotal price before tax.	Standard
3	checkTaxPriceOnly	Validates the tax amount displayed on the order summary.	Standard
4	validateEveryTextFieldFromCheckoutV2PageFields	Validates Payment Information, Shipping Information, and their descriptive text, plus the "Price Total" label.	Standard
5	checkItemNameAndDescriptionFromFactorySelectedItem	Validates the name and full description text of the selected item ("Sauce Labs Backpack").	Standard
6	clickCancelButtonAndRedirect	Verifies Cancel redirects the user back to the Products (inventory) page.	Standard
7	removeItemChangeForAnother	Cancels, swaps the cart item for a different one, re-enters checkout, and validates the updated price/tax/total.	Standard
8	addMoreItemsandCalculateThemTogether	Adds multiple items and validates the combined subtotal, tax, and total price calculations.	Standard
9	getInventoryItemsNamesAndDescriptionTest	Validates names and descriptions for multiple items shown in the order overview.	Standard
10	makeSuccessfulPurchaseValidateAndClickFinishButton	Validates the Finish button color, completes the purchase, and confirms redirection to the confirmation page.	Standard

6. CheckOutCompletePageTests (Order Confirmation)

src/test/java/saucedemotests/CheckOutCompletePageTests.java

#	Test Method	Description	Type
1	validateAllTextFieldsFromThePage	Validates the confirmation page title, "Thank you for your order!" header, description text, Back Home button color, and the pony-express confirmation image.	Standard
2	clickBackHomeAndValidateUserIsRedirected	Verifies clicking "Back Home" redirects the user to the Products (inventory) page.	Standard

7. HeaderTests

src/test/java/saucedemotests/HeaderTests.java

#	Test Method	Description	Type
1	headerNameTest	Verifies the header logo text reads "Swag Labs".	Standard
2	burgerButtonAllItems	Opens the burger menu, clicks "All Items", and verifies navigation back to the inventory page.	Standard
3	burgerAboutButton	Opens the burger menu, clicks "About", and verifies navigation to saucelabs.com.	Standard

4	burgerLogoutButton	Opens the burger menu, clicks "Logout", and verifies the user is returned to the login page.	Standard
5	burgerResetAppStateButton	Opens the burger menu and verifies the "Reset App State" option is present and labeled correctly.	Standard

8. FooterTests

src/test/java/saucedemotests/FooterTests.java

#	Test Method	Description	Type
1	clickFooterButtonTwitterandTextunder	Validates the footer copyright text and verifies the Twitter/X link opens the correct URL in a new tab.	Standard
2	facebookClick	Verifies the Facebook link opens the correct URL in a new tab.	Standard
3	linkedInButtonClick	Verifies the LinkedIn link opens the correct URL in a new tab.	Standard
